Your Exhibition

The period of the House means we do not drill into the walls. We use a STAS cobra cords and hooks picture hanging system. All artworks for the walls need to hang with cord or wire on the back and hooked onto the correct size attachment. Assistance to learn how to use the hanging systems will be completed on the day of install if required.

There are various places you can install sculptures around the House, including mantelpieces, alcoves and tabletops as well as potential floor space for larger sculptures.

Kingshill House's is open
9:30am-2:30pm Monday-Friday

There is an additional cost for weekends and evenings, however if the building is open at various times during the week the exhibition will be open at no extra charge.
